Enterprise Load Balancer for Fujifilm Synapse

Fujifilm and Loadbalancer.org enable healthcare providers to deliver a highly available, scalable and secure enterprise imaging solution.

"Would definitely recommend Loadbalancer.org products and services. Their load balancer physical and virtual appliances are well put together, cost-effective, and would recommend them to anyone looking for an easy-to-configure yet capable load balancer to add to their infrastructure. The level of after-sales support they provide is also top notch. They are always quick to respond, polite, and resolve any queries with a minimum of fuss. These guys are a great example of how to run a support team, and I've had to deal with quite a few over the years!"

Pete Taylor,
Nottinghamshire NHS Trust

SUPPORTED PRODUCTS

- Fujifilm Synapse PACS
- Fujifilm Synapse VNA
- Fujifilm Synapse Mobility

INTRODUCTION

Fujifilm's PACS and VNA solutions, combined with Loadbalancer.org's expertise in medical imaging applications, ensure intelligently designed solutions every time.
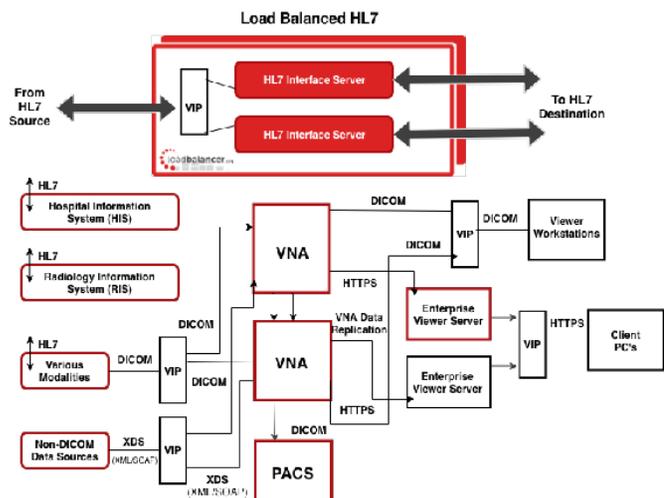

KEY BENEFITS

A cluster of Fujifilm Synapse servers (two or more) delivers guaranteed application uptime and scalable performance, with enterprise-grade application delivery, security and visibility.

- **Highly Available** - Keeping your PACS & VNA online, all the time
- **Infinitely Scalable** - Helping you grow, well beyond 500k studies/year
- **Ultra Fast** - No patience required, with super-fast image storage and retrieval

Your enterprise imaging solution should perform at scale and be easy to maintain without impacting users.

HOW IT WORKS

Loadbalancer.org's Enterprise range of load balancers provides reliable, scalable and secure image storage and retrieval for Fujifilm Synapse PACS and VNA.

WHY LOADBALANCER.ORG AND FUJIFILM

Loadbalancer.org are industry specialists in medical imaging. They have built a reputation for delivering highly available, scalable applications, and are trusted by vendors and hospitals globally.

A deep understanding of these environments ensures that, no matter how complex your enterprise imaging needs, they will be easily managed by industry-leading experts.

- The only established load balancer vendor specializing in medical imaging

- Detailed deployment documentation to get you up and running.

- Specialist consultancy to design your enterprise imaging strategy.

- Dedicated support engineers who understand your entire environment.

GETTING STARTED & RESOURCES

Contact your Fujifilm representative or Loadbalancer.org directly, for instant help on your specific requirements — and be pleasantly surprised by the quality of response you receive.
