Enterprise Load Balancer for Nuance Applications

Nuance and Loadbalancer.org enable you to deliver unbreakable, scalable and easy to manage document solutions.

"We are aiming for 100% availability from our Nuance printing and scanning solutions and Loadbalancer.org help us to achieve this. In the past, when multiple people were scanning long documents simultaneously, we used to get backlogs of two or three hours. Loadbalancer.org improve the user experience by speeding up printing and scanning tasks"

Donald Coyne, Print Support Specialist
US Bureau of Reclamation

INTRODUCTION

Nuance's industry leading print management solutions combined with Loadbalancer.org's expertise in enterprise print management environments ensure intelligently designed infrastructure, every time.
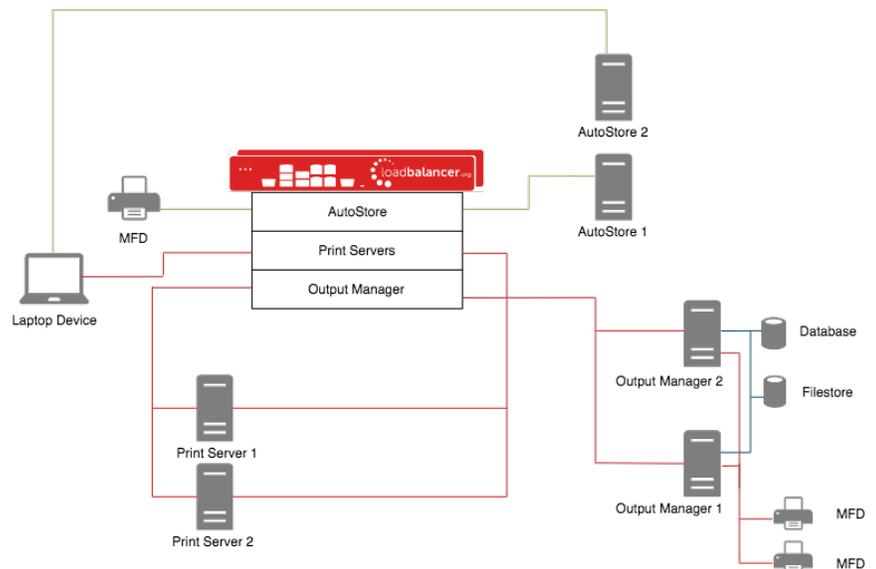

KEY BENEFITS

A cluster (two or more) of Nuance servers delivers guaranteed application uptime and performance, with enterprise-grade application delivery, security and visibility.

- **Zero Downtime** - no more complaints
- **Ultra Fast** - no more backlogs
- **Easy Maintenance** - no more broken updates

Your print services should perform at scale and be easy to maintain without impacting users.

HOW IT WORKS

The load balancers constantly monitor the Nuance application servers, balancing the workload and protecting from system failure.
