

## Manage all your ADCs from a single platform

Optimise your load balancer estate for more effective application delivery across on-prem, cloud, hybrid and multi-cloud environments, with this intuitive vendor-agnostic, subscription service.

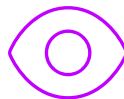

## Loadbalancer Portal

### Manage any ADC, anywhere, anyway you like, with one ADC Portal to replace them all.

Break free from product nuances and optimize your entire ADC infrastructure with our centralized, multi-vendor management platform for unmatched visibility, security, and automation of your load balancer assets.

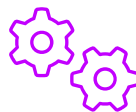

#### Enhance visibility

A single, consolidated view of all your load balancing assets. Wherever they're located. Whoever the vendor.

#### Automate tasks

ADC software is constantly evolving to ward off threats and improve functionality. Take away the burden of manual changes with automated scheduling.

#### Improve security

Keep your ADCs protected with instant CVE alerts for your ADC estate, plus the latest suggested mitigation and remediation advice.

*The ADC Portal gives us instant visibility and remote control of our ADCs, saving us huge amounts of time and money, as well as keeping our appliances more secure."*

## Smart

Clever not complex

- Easy-to-understand interface that feels intuitive
- Vendor-agnostic
- Streamlines complex infrastructure

## Flexible

Scalable and future-proofed

- Crafted around your infrastructure
- Adapts with you as you grow
- Affordable monthly subscriptions

## Unbreakable

Secure and resilient

- For enterprise apps that never miss a beat
- Safeguards your critical services
- Effortless operations, for elevated results

## We do things differently

### Less time managing, more time optimizing

Simplifying operations, streamline workflows, and prevent outages with effortless centralized management.

### All your load balancers under one roof

The ADC Portal integrates seamlessly with multiple load balancing vendors, including F5 BIG-IPs, Citrix NetScalers, and Kemp LoadMasters.

### Greater ROI

Get powerful performance without complexity or high costs, empowering you to take back control of your application delivery.

## Technical specifications

### Centralized management

- ADC dashboard
- Online ADC backups and storage
- Online ADC updates
- Asset scheduling

### SSL certificate management

- ADC SSL certificate visibility

### Shuttle sidecar agent

- Secure bi-directional communication
- Encrypted WSS/mTLS
- WARP proxy
- PGP encryption
- Audit logs

### Security insights

- CVE alerts and remediation advice

### Secure login

- Single sign-on (G Suite + Azure AD)
- Two-factor authentication (SMS + APP)
- SAML

### Account access

- Secure Direct Access
- Secure Remote Access
- Advanced RBAC

### Warranty and support services

Full access to our Technical Support Engineers globally:

- 24/7 with standard support
- During business hours (8x5) with basic support
