

How it benefits you

Loadbalancer offers a one-of-a-kind licensing model to businesses seeking the ultimate in flexibility, value, and scalability.

Empowers multiple teams

Multiple teams can quickly spin up and manage their own load balancers, without having to go through a central department.

Greater resilience

An unlimited number of instances supports a more resilient per-app approach, with an HA clustered pair used for each application for high availability, avoiding noisy neighbour system.

See the savings add up

As soon as you deploy as few as 6 appliances, the cost per appliance drastically reduces, saving you thousands in the process.

Unrestricted throughput

With our Site and Global Licenses you can use as much VM resource as you want, supporting High-Performance Computing and AI-workloads.

Scale at the touch of a button

Start deploying load balancers quickly and easily as soon as your traffic demands increase, without the fear of cost creep.

Unrestricted licensing

Deploy an **unlimited** number of load balancers at one physical site or from any location globally, for one low, fixed cost.

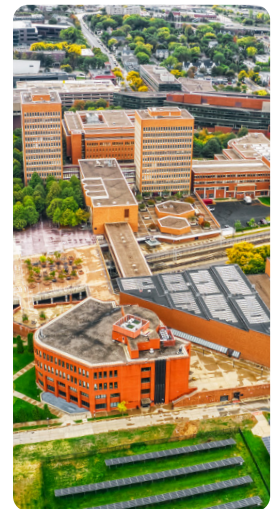

Site License

Deploy as many virtual load balancers as you like at a single, physical site, allowing the creation of any number of new instances on demand.

“

The Site License give us the freedom to set up a new load balancer whenever we want to.”

Chris Griffin,
Technical Specialist,
Birmingham and Solihull Mental Health NHS Foundation Trust

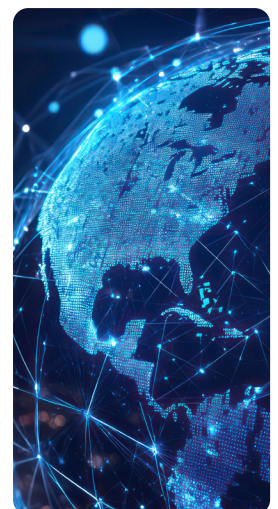

Global License

Deploy an unlimited number of virtual load balancers from anywhere in the world on demand.

“

Loadbalancer.org provides a rock-solid platform for delivering reliable, high performance applications for students and staff.”

Matt Hall,
Assistant Director of IT,
Bournemouth University

Which license is right for me?

	Site License	Global License
Locations*	1	Unrestricted
Instances	Unrestricted	Unrestricted
Throughput	Unrestricted	Unrestricted
SSL TPS	Unrestricted	Unrestricted
Servers	Unrestricted	Unrestricted
GSLB	✓	✓
WAF	✓	✓

FAQs

Does the Site and Global License include support?

No, but we offer a special support package that covers all of your appliances that can be purchased separately.

Is there a limit to the number of appliances covered by the Site and Global Licenses?

The short answer is no. These licenses let you deploy as many instances as you like, whenever you need, on your choice of platform.

How many appliances do I need to buy to start making a saving with the Site License?

Having six or more appliances at a single site means the Site License could save you money.

When should I consider a Global License?

If you have two or more separate sites, no matter where they're located, a Global License is likely to be amazing value.

What payment terms do you offer?

Our Site and Global Licenses can be bought outright (perpetual) or as a subscription plan.

NHS Trust uses Site License to boost application performance and resilience

The Site License has given the Trust the ability to install dedicated load balancers for each of its critical systems. This per-application approach improves the resilience of vitally important clinical applications by preventing an issue on one platform from inadvertently causing downtime on another
