

Partnering to tackle global transport and aerospace challenges

The world of transport is changing – at pace. Global supply chain integration, automation, and impenetrable cybersecurity are just a few of the ways providers are embracing technology to drive improvements to customer experiences and, crucially, outcomes. So much progress brings new challenges, chief among them – the current explosion in data. By ensuring the continuous flow of this data, the role of load balancers has become increasingly crucial. Loadbalancer.org continues to be a trusted leader in the sector, designing solutions to solve the complex challenges that arise when transport providers rely on applications to deliver essential services.

Leading the way in transport

For almost 20 years Loadbalancer.org has ensured high availability and zero downtime to organizations across the world with over 10,000 deployments globally.

We take a supportive approach to our partners' needs to ensure that their systems stay up and running and ensure logistics are handled quickly and efficiently.

The Loadbalancer.org advantage

- Create a high availability (HA) architecture for zero downtime, resulting in improved access for both transport providers and customers.
- Reduce the cost of your current load balancing solutions.
- Facilitate rapid and seamless growth with no hidden costs.
- Optimize application traffic both locally and globally (multi-site), improving the workflow both on-site and at remote locations.
- Simple, flexible, supported deployment models reduce start-up time.
- Protect data from external threats and improve compliance with a range of security features.
- Industry-leading pre- and post-sales support from transport experts eliminates needless extra workload.
- Our Freedom licence enables project future-proofing, with harmonious migration between hardware, virtual, cloud, or a hybrid version of the product.

The company I work for designs and builds data centers for airports all over the world, and four years ago we started using Loadbalancer.org's virtual appliance.

During that time I have only had to reach out to their support team twice. The quick response and level of attention I received was like no other. I fly to sites to oversee the turning up of the systems and the pressure is always high - so quick response times and great attention to detail from our partners is critical."

Senior Systems Engineer,
ARINC,
Leading transport and aerospace partner

Partnerships refined through insight

Over the past decade, we have rolled out our solution to over 100 airports and have a great understanding of the transportation industry, having worked with rail and aviation technology businesses.

In an ever-changing world, with many industries and businesses moving away from traditional hardware ADC load balancers, you need a partner that you can depend on to meet your specific needs and requirements. Whether that involves getting hardware shipped globally, maximizing the reliability of your company's product or service, or simply having a world-class support engineer jump straight onto your ticket whenever you need assistance 24/7, 365 days a year.

If you are looking for a load balancing vendor that cares about your issues then look no further and talk to us today to find out how we can help you.

Consultative approach to support

A support plan from Loadbalancer.org just isn't comparable to what other vendors might offer. Thanks to our unique approach to support, we get involved with a lot more than just load balancer issues – our experienced technical engineers become extended members of your own team, and are always available should you need to leverage their expertise. We also include security updates, product updates and all features as standard in our support contract – with no extra fees. If things do go wrong, use our tier-less helpdesk to access our highly-trained engineers, who will get your systems back online as quickly as possible.

Loadbalancer.org has an overall rating of 4.9 out of 5 in the Application Delivery Controllers market, based on 115 reviews as of 1 March 2022.
